* Hex dimensions are taken from flat of hex and not across corners. Hex may be substituted with round stock. Hex column would then indicate dimension taken across wrench flats.

Decimal dimensions are ± .06 in. (1.5mm).

Dimensions are subject to change without notice.

Part configurations are typical and do not necessarily represent actual appearance.

††Note: 1/4" thru 1-1/4" are flush face couplings. 1-1/2" & 2" maintain a recessed face on coupler half.
